

UNINSTALL GUIDE

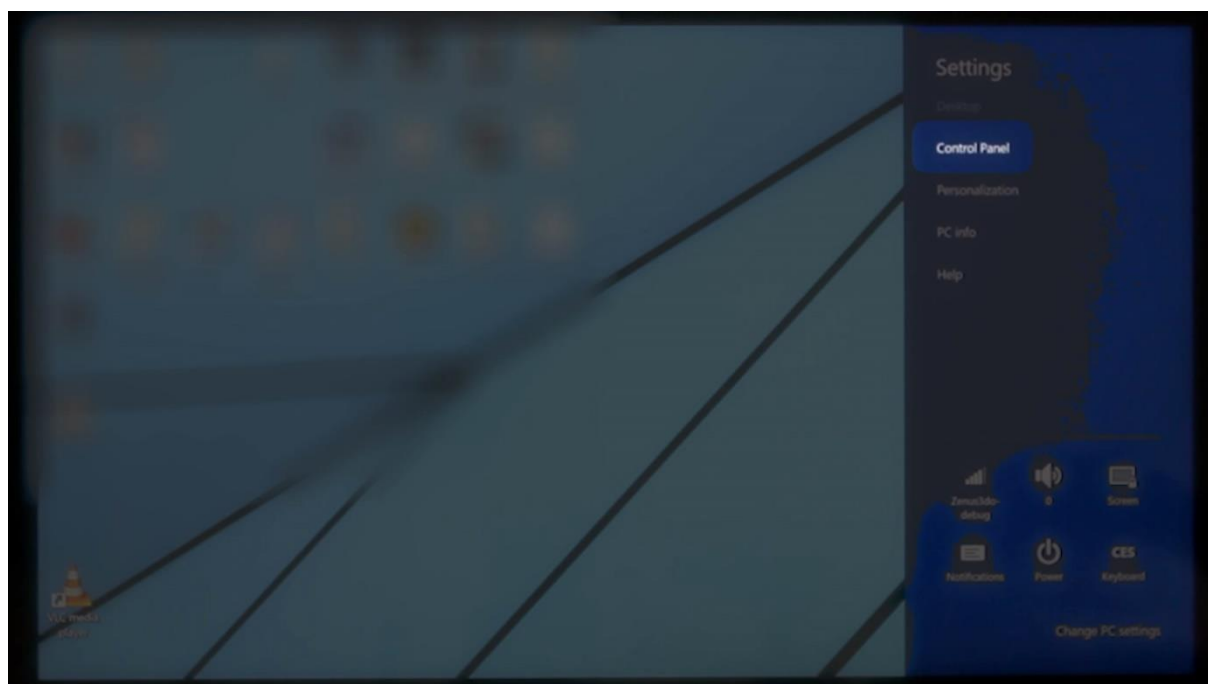

Uninstalling the Microsoft Office Add-ins

The standard uninstall process is built-in to the add-ins. Simply click on the Uninstall icon located in the Corinth Classroom ribbon tab at the top of your Microsoft Office application. Repeat this process within both Office applications to uninstall both add-ins. Upon restarting Office, the Corinth Classroom add-in will be gone.

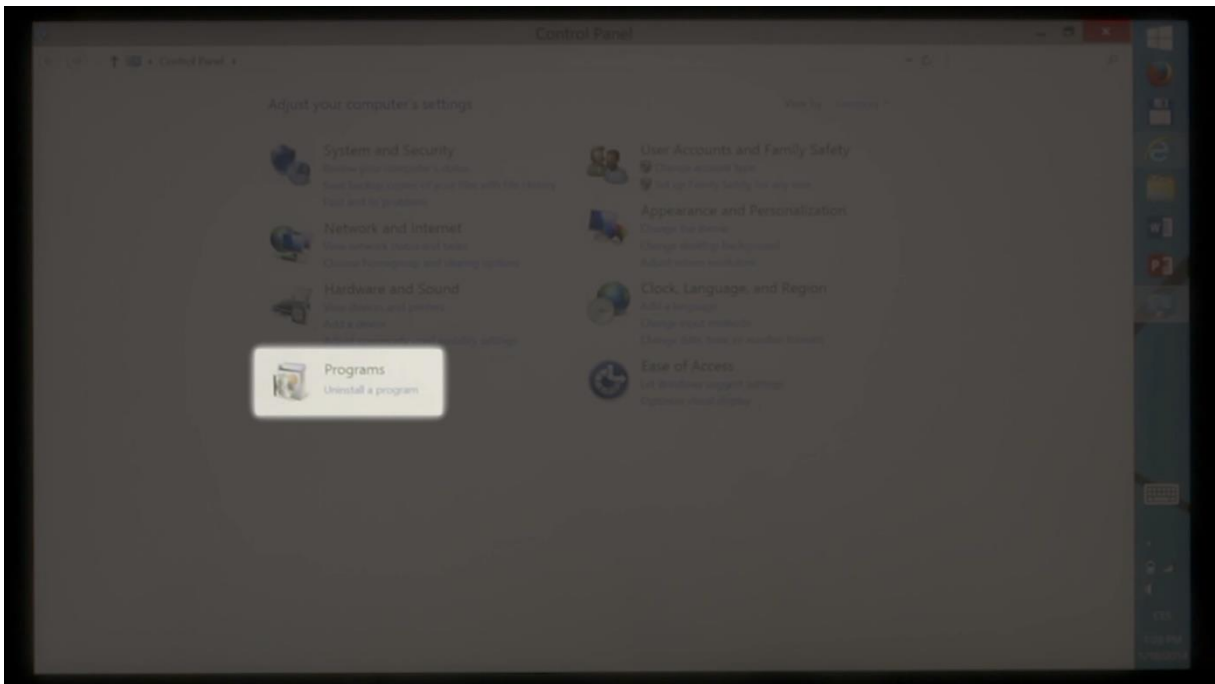

If you encounter any problems with this uninstall process, please try the **following method**:

1. From the Windows desktop or Start screen on your device, bring up the Settings tab from the right side and select Control Panel.

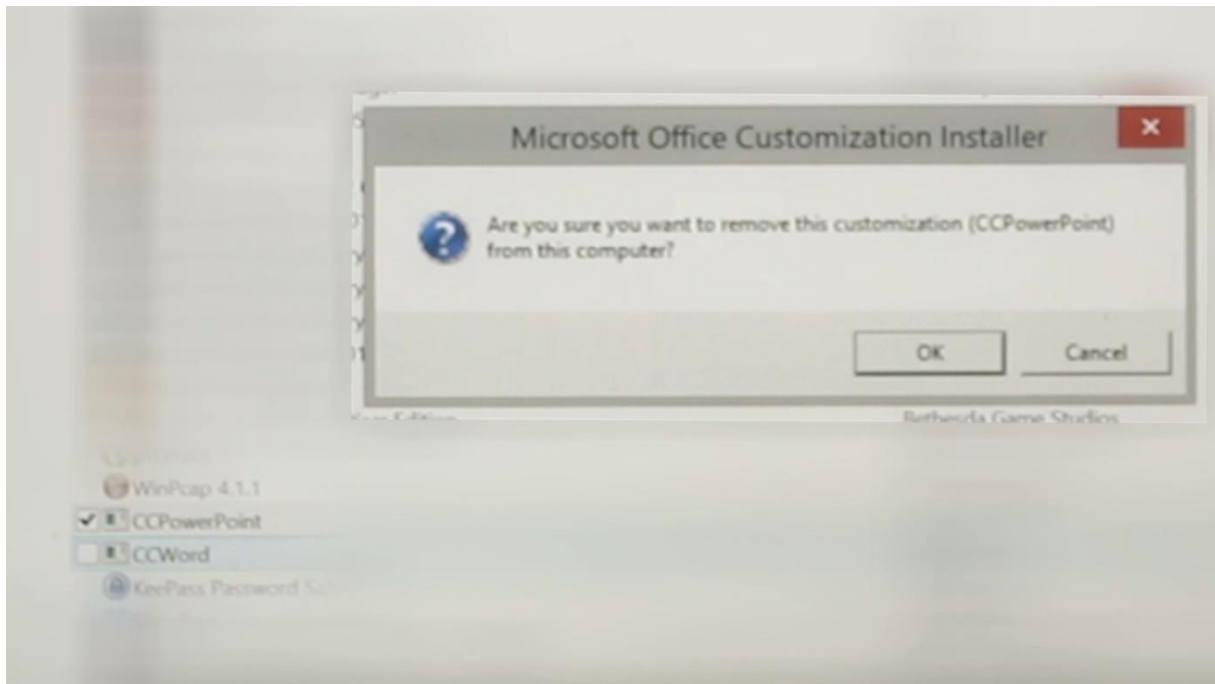

2. Next, select the Uninstall option under the heading Programs.

3. Locate the Word or Powerpoint add-in file on the list, named CCWord and CCPowerpoint respectively. Depending on your device either right click or tap and hold the item, then select the Uninstall option that appears.

4. Confirm the uninstallation dialog to remove the add-in from Microsoft Office and your device.

5. Repeat steps 1-4 for the other add-in if you want to uninstall both.

Thank you for using Corinth Classroom Lite! If you have any questions, problems or additional comments, please contact us [HERE](#).
